

SHARKS 11

Streamlining Software Requirements:

Effective Communication from Team Leader to
Developer

TEAM MEMBERS

- 1.Hariharan - Team Leader(Scrum Master)
- 2.Kabilan - Developer
- 3.Arshad - Developer
- 4.Kowsik - Business Analyst
- 5.Likith Reddy-Business Analyst
- 6.Bhuvan-Designer
- 7.Sriram-Designer
- 8.Hemachandran-Tester

REQUIREMENTS

1. We need a navigation bar at the top with three links: HOME, SERVICES, and CONTACT. Clicking on them should smoothly navigate to different sections.
2. The HOME section should have a welcoming heading with the client's name and a photo. Let's keep it clean and professional.
3. In the SERVICES section, we'll have two cards - one for 'Content Creator' and the other for 'Social Media Marketer.' Each card should include a brief description of the services offered.

4. Keep it sleek and visually appealing. Use a simple navigation bar, and let's ensure the cards in the SERVICES section have a professional look.

5. In the CONTACT section, display the client's phone number and email address. Make it easy for visitors to reach out.

6. I've provided some placeholder text for now. You can use generic details, and we'll update them with the client's information later.

7. Great! Let me know if you need any clarification. Let's make this page outstanding! This conversation outlines the project requirements and sets the developer on the right track for creating the landing page.

Thanks!
